## Audit Command Language

# ACL 303 Scripting

ACL 303 Scripting empowers professionals to harness the full potential of their data through practical scripting techniques. This hands-on programme builds confidence in developing, refining and optimising ACL scripts for effective data analysis and reporting.

### Topic Coverage

#### Day 1 ▶ Fundamentals & Data Access

Learn how to create and fix scripts, use functions and variables, and get data from different sources. Includes practice sessions.

#### Day 2 ▶ Scripts for Analysis

Write scripts to filter, analyze, and report data. Learn how to clean data and find useful insights. Include practice sessions.

#### Day 3 ▶ Organizing & Improving Scripts

Prepare and organize data, use script tools, and write better, easier-to-read scripts. Include practice sessions.
